#NEXT: online learning platform about artificial intelligence on Thinkific

#NEXT is aimed at students and aims to equip them with the knowledge and skills in artificial intelligence (AI).

The online learning platform consists of six thematic moduls, that provide students with a clear and structured approach to learning.

What the learning platform includes #NEXT?

- Meet the AI: the basics and history of AI and its impact on business and society.
- AI in action: Practical applications and technical foundations of AI, including ethical considerations.
- AI sidekick: Realistic implementation strategies for overcoming AI-related challenges.
- Soft Skills: Key skills for working effectively with AI include communication and critical thinking.
- AI in Practice: Implementing AI in the classroom and personalized learning.
- AI updates - progress, developments, inauguration: The importance of knowledge of AI development for informed citizenship.

#NEXT

Why Thinkific?

The thematic sections are integrated into the Thinkific platform, which is available for free and translated into 7 languages, allowing students from all over the world to participate in this educational program. Each module includes introductory videos, critical thinking questions and "Fact x Fiction" blocks to debunk myths about AI.

Main objectives of the online educational platform #NEXT

The educational platform aims to provide students with a comprehensive overview of Artificial Intelligence (AI) through a structured curriculum that covers both theoretical and practical aspects of AI.

The program emphasizes the development of soft skills such as communication and critical thinking, which are essential for working effectively with AI. Students will learn how to use these skills when putting AI into practice.

It focuses on ethical issues and realistic AI implementation strategies to help students make informed decisions and better understand the evolution of AI and its impact on society and business.
